Book One

The Musings of The Congniteratii

Chapter One

¹ There doesn't appear to be any actual evidence to support this 'belief in gods' lark.

² This book is true. ³ We know this is true, because it just said so.

Book Two

The Congniteratii in the Universe

Chapter One

¹ To the best of our knowledge at the time of writing, the universe is about 13.7 ± 0.2 thousand million years old, ² and the Earth is about $4.567 \pm 1\%$ thousand million years old.

Chapter Two

¹ The variations in the biological organisms on Earth, described as the changes in the genetics of a population over time, is best explained in terms of evolution.

Book Three

The Congniteratii and the Search for Truth

Chapter One

¹ The ratio of the circumference of a circle to its diameter in Euclidian geometry is an irrational, transcendental real number with a value, to fifteen significant figures, of approximately 3.14159265358979.

Chapter Two

¹ Genes mutate. ² Individuals are selected. ³ Populations evolve.

Book Four

The Laws of Congnition

Chapter One

¹ Use reason and logic to identify and deal with the world around you.

² If someone tries to convince you of something, ask for evidence. ³ Reality has nothing to fear from investigation.

⁴ Evidence should be verified as often and by as many individuals as possible.

Chapter Two

¹ Reality rocks, ² and you only have one life. ³ Make the most of it.

Chapter Three

¹ Do everything this book tells you to do, if you like.

² Don't be a dick, ³ try to have a good time, ⁴ and try not to die.
